

UNDER CONSTRUCTION

Two Highland Avenue bridges to open; Traffic to shift along Highland in SB, Rialto

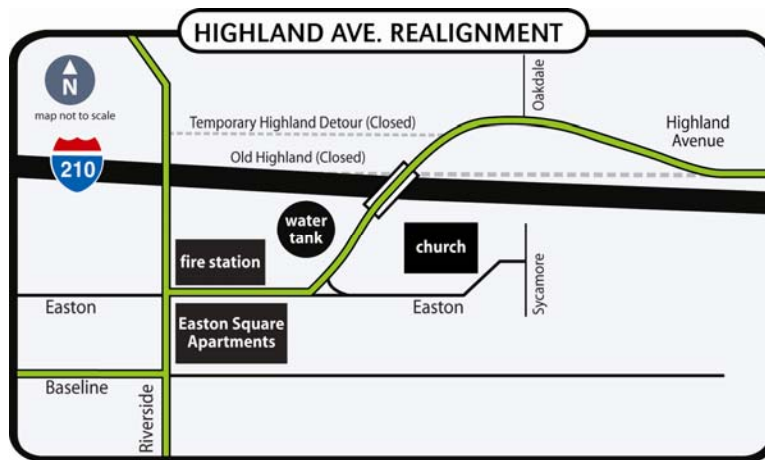

Drivers will be following a new alignment of Highland Avenue next week in San Bernardino and next month in Rialto.

Crews are completing the Highland under-crossing in San Bernardino and will close this section of street between California Street and Route 30 for paving and temporary striping at 9 p.m. on August 25. This new street alignment is expected to open August 26

or 27.

Further west, the Highland over-crossing in Rialto and accompanying realignment of Highland west of the bridge will open the weekend of September 9-10. Lane closures and detours will be in effect that weekend for paving, striping and signal work. See map below for the new alignment in Rialto.

Drivers should watch for signs and drive carefully through these areas, which will be used heavily by commuters during the next year, until Route 210 opens in late 2007.

Ramps to be closed between I-215, Route 30

Route 210 work will require full closures of ramps connecting Route 30 and Interstate 215 in San Bernardino, August 25 to September 22.

The following detours have been established:

■ **Southbound I-215 ramp to eastbound Route 30** — Drivers should continue on I-215 past the interchange and exit at the 27th Street/Mt. Vernon Avenue off-ramp, turn west onto Highland Avenue and turn northeast (right) to enter eastbound Route 30.

■ **Eastbound Route 30 to northbound I-215** — Drivers should continue on Route 30 past the interchange and exit at the H Street off-ramp, head north on H, enter westbound Route 30 and then enter northbound I-215.

For a map of these detour routes, go to:
http://www.sanbag.ca.gov/commuter/pdf/08-22-06_210-I-215closures.pdf

Please allow extra travel time and follow all signs and detour routes through this area.

Lilac pedestrian bridge to re-open Aug. 28

The Lilac pedestrian bridge will reopen on August 28, just in time for middle school and high school students who are returning to class after their summer break.

Crews closed the bridge in June to work on lighting, permanent fencing, drainage and sound wall improvements. The majority of this work is complete, but some additional landscaping and drainage work will occur later this year.
